

BANDS & DJS

ARRIVAL

Google maps is the most reliable way to find us (just use 'Homme House'). On arrival, follow signs up to the gravel in front of Homme House (signposted 'Homme House Weddings'). From here gear can be unloaded the short distance into the house (c. 5m); there is a ramp for any heavy goods.

Cars and vans should then be parked in the main car park.

The ideal arrival timing is during the wedding breakfast to enable undisturbed unloading, set up and sound checks (dining is in a separate room from evening music and dancing).

PLI & PAT TESTING CERTIFICATION

All wedding professionals who work at Homme are required to supply proof of their valid Public Liability Insurance cover and PAT Testing certification.

SPACE & POWER

Evening music usually takes place in our Panelled Room. For a marquee wedding breakfast, evening music and dancing takes place in the Dining Room.

Panelled Room Dimensions: 9.5m x 6.5m approx.
Band/DJ Space: 6m x 3m approx.
Dining Room Dimensions: 11m x 7m approx.
Band/DJ Space: 6m x 3m approx.

Both spaces have 2 double plug 13 amp sockets dedicated to DJ or band equipment.

FLOOR PROTECTION

The floors are antique wood and scratches from equipment cause irreversible damage. We provide matting to protect the floor and request

that musicians are mindful of where they place instruments, speakers, microphones and lighting so that there is no risk of damage. Equipment should never be dragged across the floor.

STORAGE

Equipment boxes/cases can either be reloaded or stored in the corridor to the private quarters of the house or kitchen adjacent to the Dining Room (marquee weddings).

SOUND LEVEL

We do not have a limiter but request that music is played at a sound level which allows guests to be heard when they are at the bar and in the other reception rooms.

The Panelled Room is completely wood panelled so has very good acoustics. We find that **electronic drum kits can be a good way to set an appropriate noise level**. We ask that musicians comply with our requests and respect the fact that they are in our family home.

SMOKE MACHINES

We are unfortunately not able to accommodate smoke machines at Homme.

LICENSE RESTRICTIONS & TIMINGS

Our license states that all amplified and evening music must take place inside the house.

Our license states that **all music must finish by 23:45**. It works well to start building up to the last song from 23:30 to meet this timing.

Our license states that all the windows, shutters and curtains remain closed during evening music performances to minimise the noise level outside the house.

BANDS & DJS

BREAKS & REFRESHMENTS

We are often able to provide a dedicated room for changing and for relaxation during breaks, and can help with any agreements made with respect to food and refreshments during the evening.

DEPARTURE

Musicians are welcome to drive up to the front of the house to load up equipment. Our license states that any guests and suppliers must have vacated the premises by 00:15. We would be grateful if you could keep noise outside to a minimum on departure.
